

Premium Powder-Coated Steel Screen

E-Z-LOCK® Small Hole

Features:

- Medium Debris Loads with Small-Sized Holes
- Powder-Coated Steel
- Available in 5", 6", 7" Widths

Description:

The original E-Z Gutter Screen is still one of the most versatile, but with a tighter mesh to trap finer debris. Made of powder-coated steel. It can be snapped into the front of the gutter for quick and easy removal without disturbing the shingles.

E-Z to Install: Locks into gutter, without disturbing the shingles — snaps in and out for easy cleaning. If installing back edge under shingles, we recommend using E-Z-Under.

Like all gutter protection products, depending on your debris type and load, E-Z-Lock® Small Hole will require maintenance from time to time, by brushing off the top of the panels.

Size: E-Z-Lock Small Hole comes in 4 foot lengths and 5", 6", or 7" widths.
